

A safe, healthy  
work environment is  
a basic human right.

The Clean Electronics Production Network unites diverse stakeholders to understand, address, and eliminate workers' exposure to toxic chemicals in the electronics supply chain.

CEPN is a global, leadership network of diverse stakeholders collaborating to reduce worker exposure to toxic chemicals in the electronics supply chain - a complex issue that no individual business or organization can solve alone.

# CEPN Resources

## Complementing RBA's Chemical Management Leadership Program

2.3 Identifying and assessing priority chemicals of concern\*

LEARN ABOUT OUR PRIORITY CHEMICALS AND HOW WE SELECTED THEM

2.2 Ensuring health & safety, accident prevention, and response\*

**Chemical Safety Training Series**  
for Workers

2.6 Reducing or phasing out priority chemicals of concern along value chains\*

**TOWARD ZERO EXPOSURE**

   **FAIRPHONE**

A Commitment Program to  
Protect Workers from Chemical Hazards  
in the Electronics Supply Chain

\* Development of guidance to support implementation of Target D6, Draft Outline 17 February 2025

# Thank You!

Pamela Brody-Heine  
Senior Director, CEPN

## How to get involved:

- *CEPN welcomes individuals and organizations with demonstrated leadership supporting safe and sustainable workplaces*
- *TZE is open to all companies in the electronics industry (CEPN membership not required)*

## Collaboration is Key to Progress

*Takes more effort and time, but collaborative processes generate more credible and impactful results*
