

Inter-Organization Programme for the
Sound Management of Chemicals

WORKING TOGETHER TO
END CHEMICAL POLLUTION

Strengthening Economic and Industry Sector Engagement and Action Along Value Chains

Implementing the Global Framework on Chemicals in Economic and Industry
Sectors: A global survey to support development of a GFC implementation
programme on industry engagement and action along value chains

December 2024

Global survey to support the development of a GFC implementation programme on industry engagement and action

Scan me

Aims:

- support the development of a GFC implementation programme
- raise awareness in industry associations and companies
- elicit input from industry stakeholders

Feedback consolidated in Sept. 2024

- 225 responses: 101 companies, 39 associations, 85 other stakeholders

Implementing the Global Framework on Chemicals in Economic and Industry Sectors:

A global survey to support development of a GFC implementation programme on industry engagement and action along value chains

Completion Deadline: [Open-ended](#)

IOMC and the GFC Secretariat are continuously interested in learning from and engaging with stakeholders from economic and industry sectors concerning the implementation of the Global Chemicals Framework. The survey link therefore remains open. If you are a company, association or other interested stakeholder and have not yet completed the survey, we encourage you to do.

Purpose:

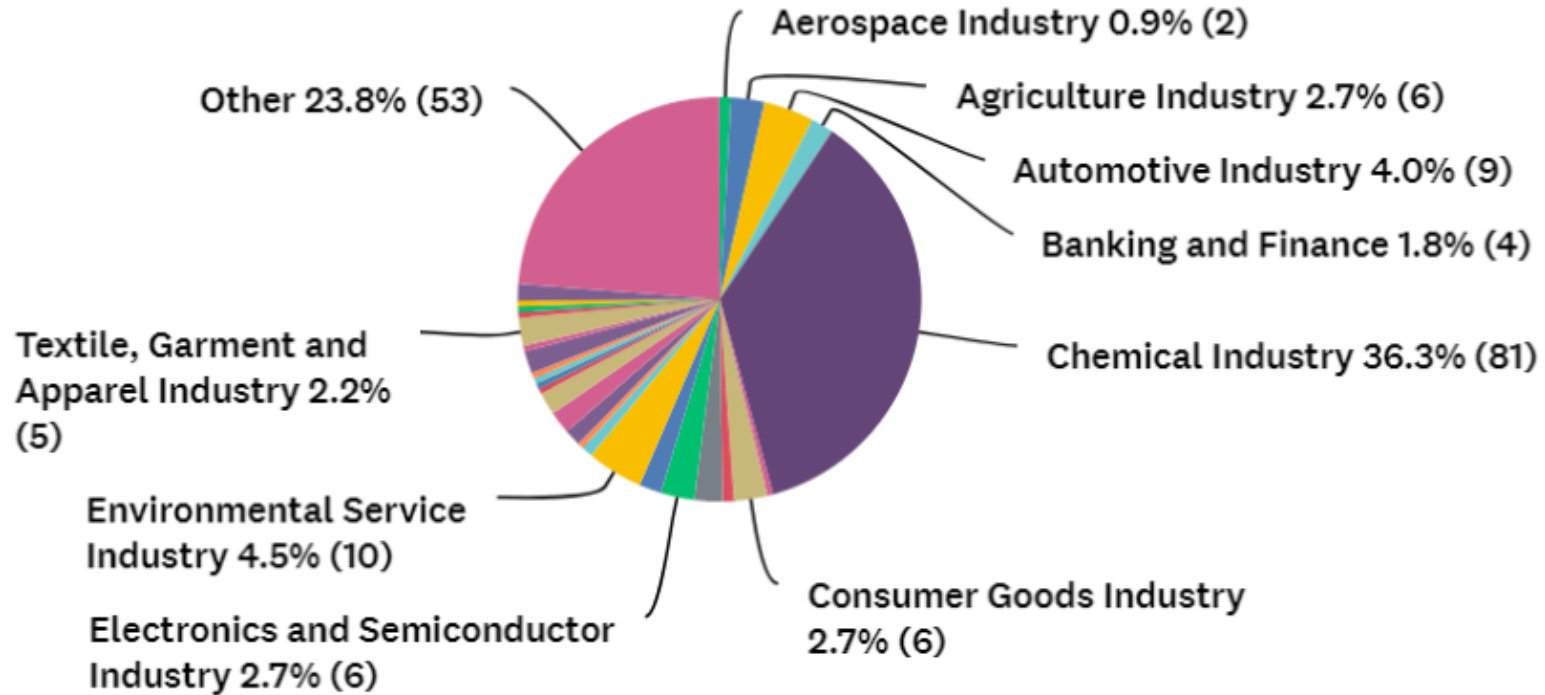

This survey is administered by the Inter-Organization Programme for the Sound Management of Chemicals (IOMC)^[1] in collaboration with the Secretariat of the Global Framework on Chemicals. It aims to raise awareness in industry associations and companies about the Global Framework on Chemicals (GFC) and its industry-related targets, by specifically addressing industry associations and companies producing, distributing and using chemicals, spanning from raw material extraction to products and final disposal. Equally important, it seeks to elicit input from industry stakeholders about their ongoing and planned efforts to implement the GFC, and their interest to engage in, and contribute to a possible global GFC Implementation Programme on industry engagement and action along value chains.

About the Global Framework on Chemicals:

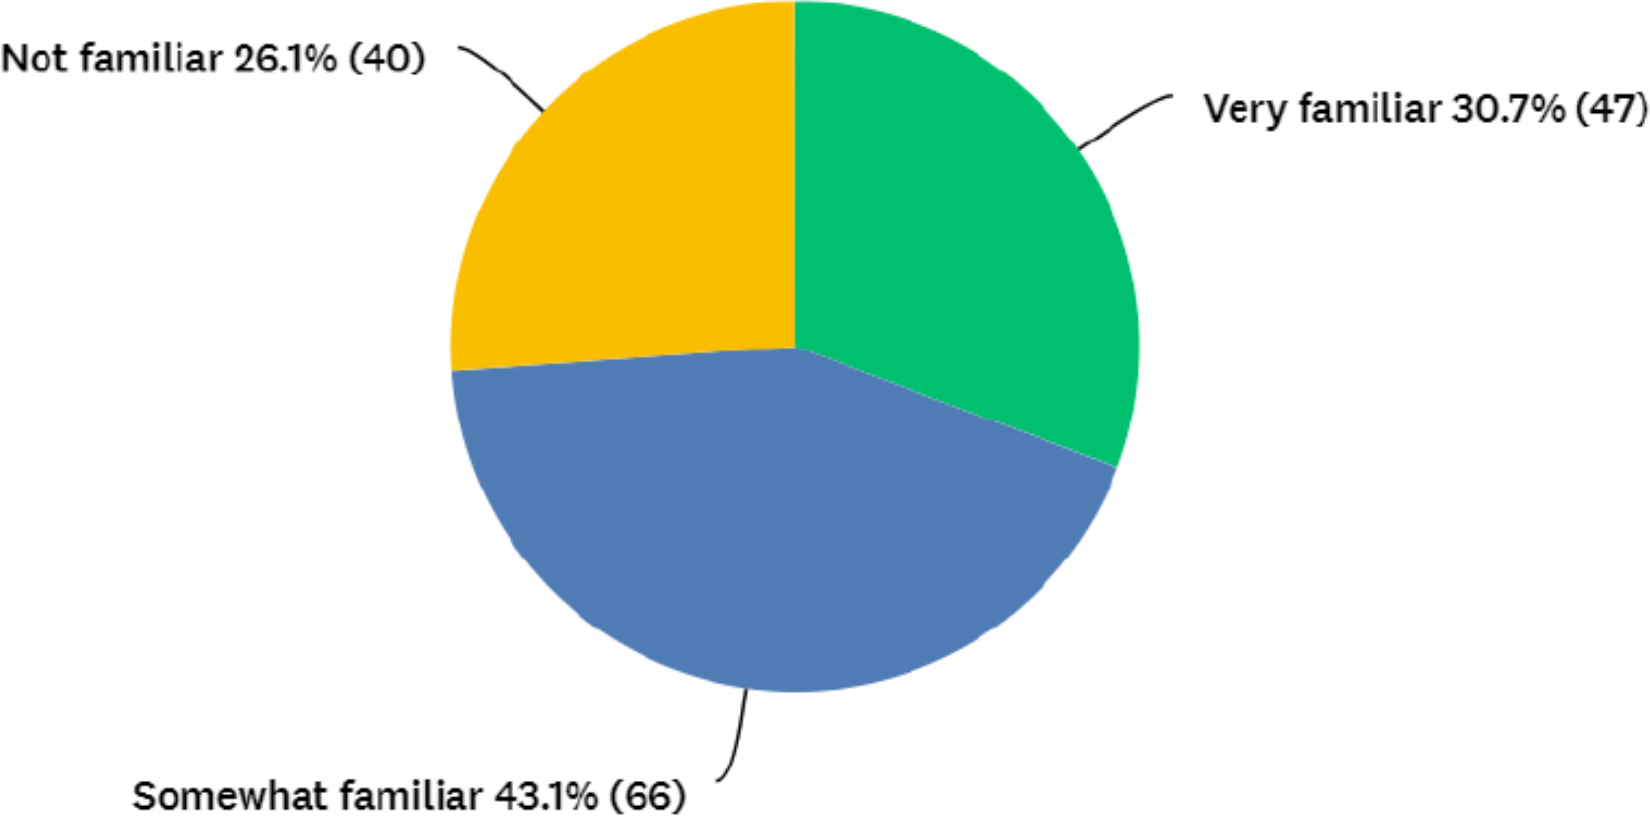

The ["Global Framework on Chemicals: For a Planet Free of Harm from Chemicals and Waste"](#) (GFC) was adopted at the fifth International Conference on Chemicals Management (ICCM-5), held in September 2023 in Bonn, Germany, by close to one thousand delegates from around the world representing governments, industry and civil society. A core element of the GFC are its [5 Strategic Objectives and 28 Targets](#) that guide stakeholders at all levels to take measurable action to address the sound management of chemicals and waste.

[1] The ten participating organizations of the IOMC are: FAO, ILO, UNDP, UNEP, UNIDO, UNITAR, WHO, OECD, World Bank, and the Basel, Rotterdam and Stockholm (BRS) Conventions

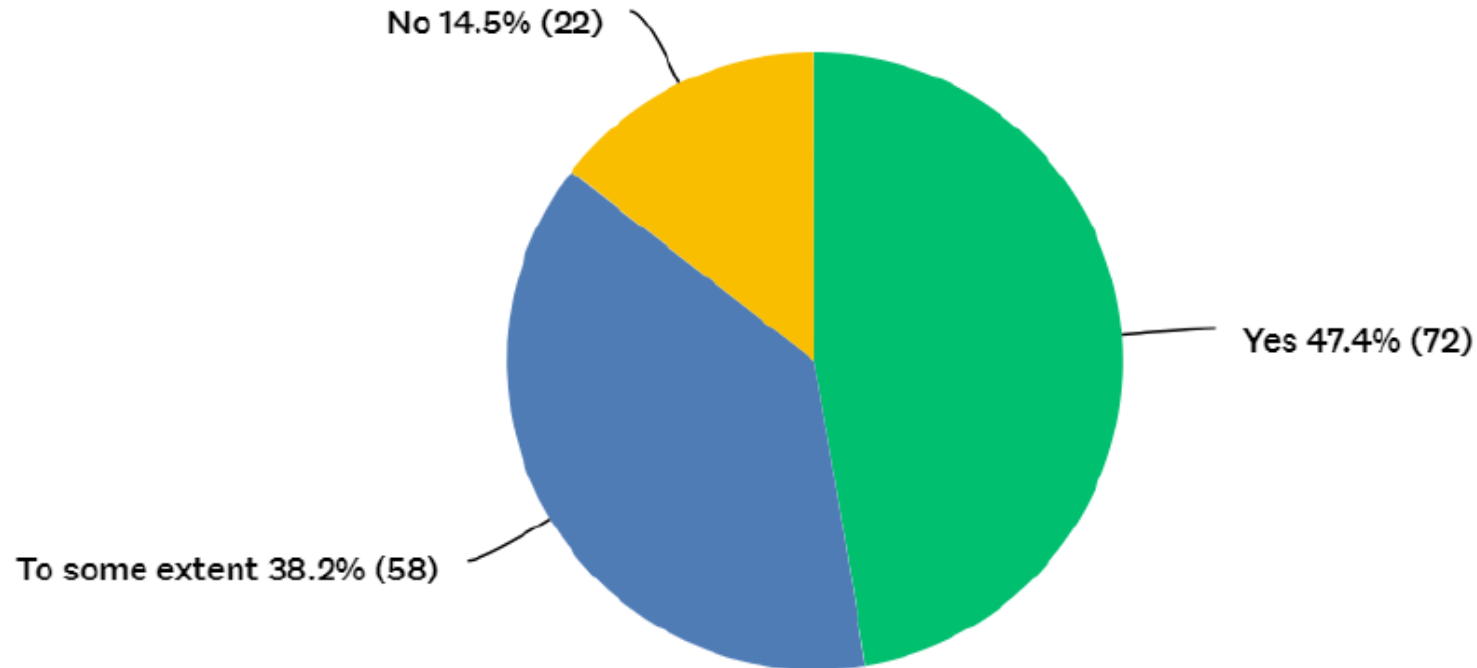

Economic and Industry Sectors - (n=223)

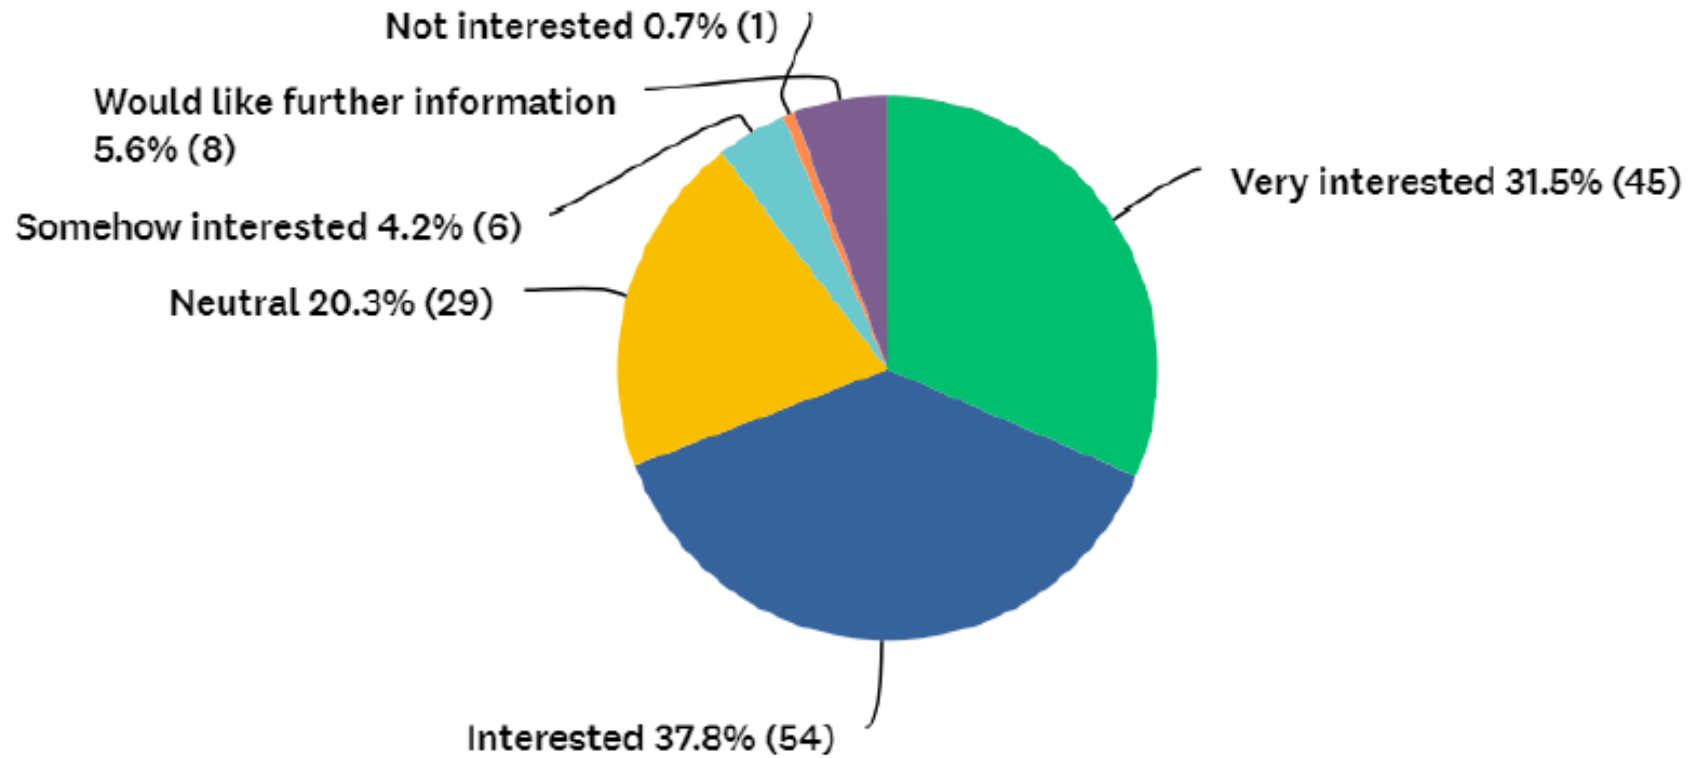

Familiarity with the Global Framework on Chemicals adopted in 2023 - (n=153)

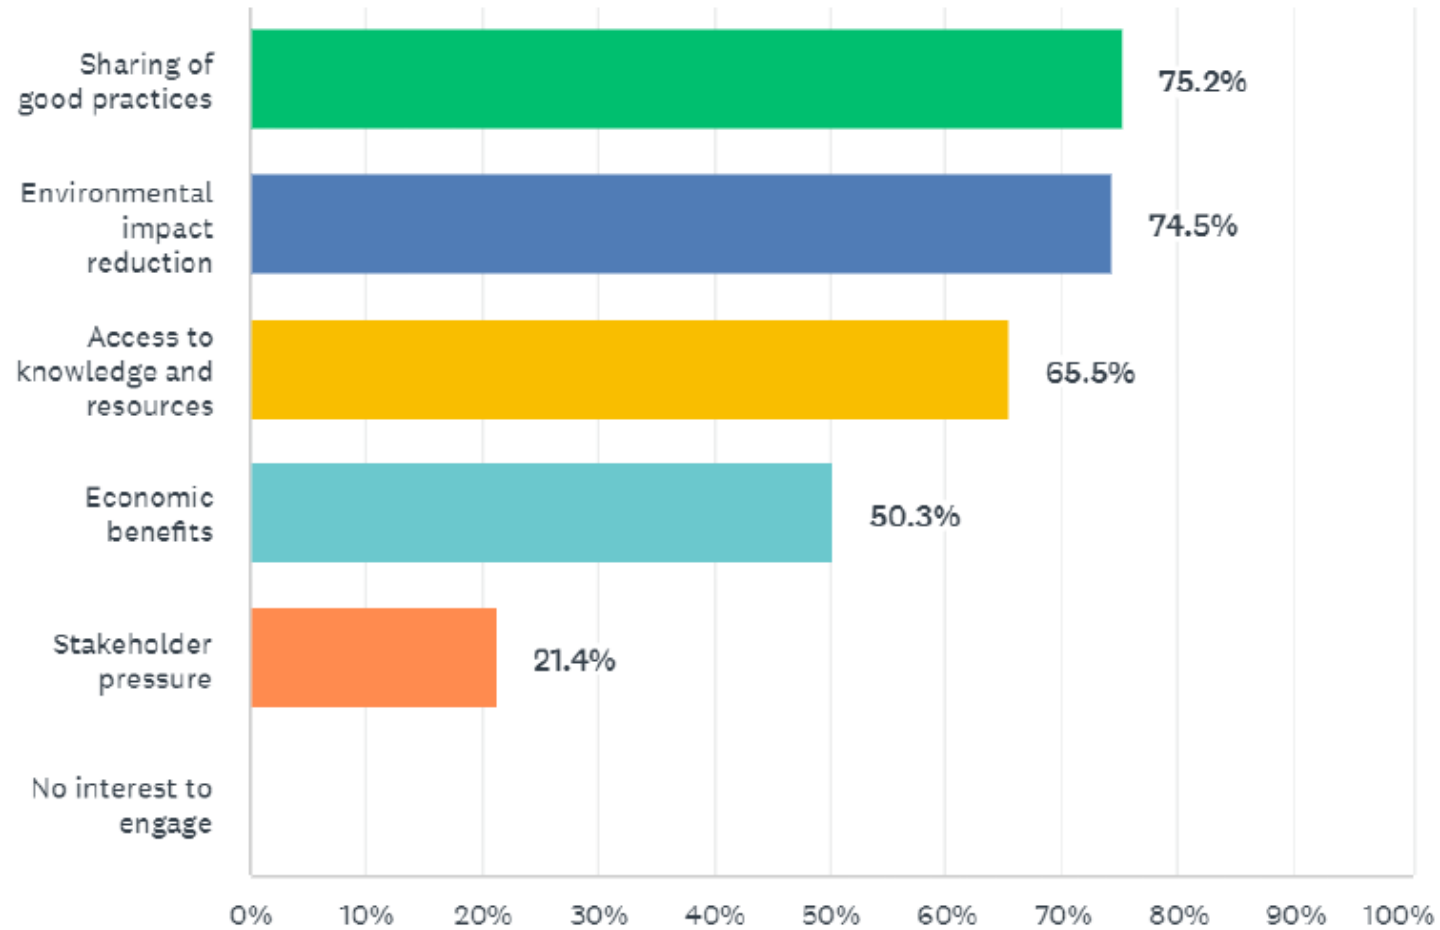

Please rate your level of agreement with the following statement: "My company/association/organization already has a chemicals and waste management policy or strategy, or other relevant policy." - (n=152)

Interested in shaping and participating in a GFC Implementation Programme focusing on industry engagement and action - (n=143)

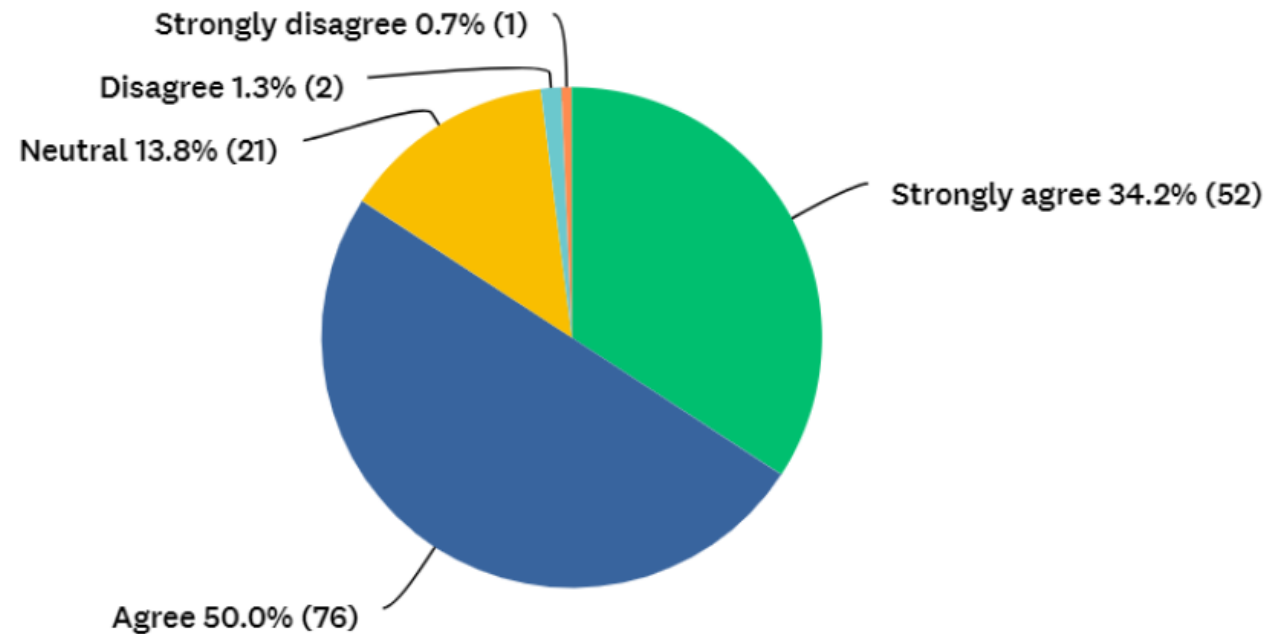

Motivation to participate - (n=145)

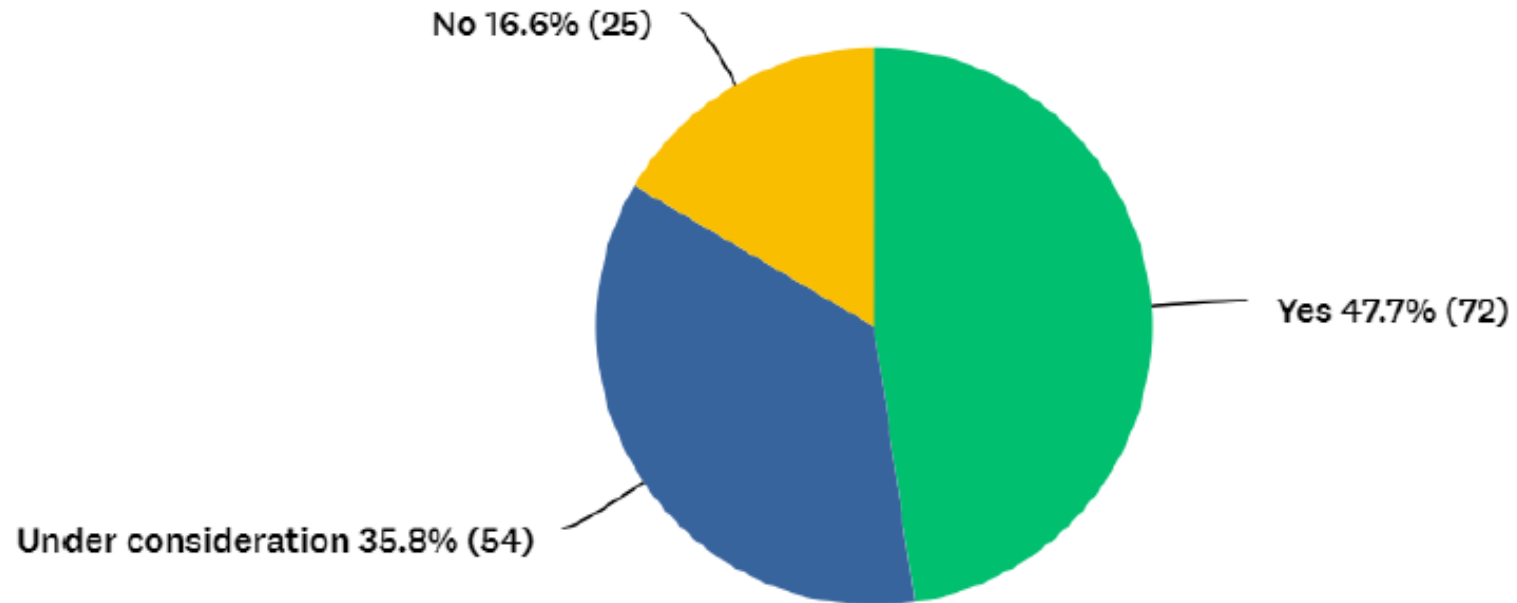

Please indicate your level of agreement with the following statements:

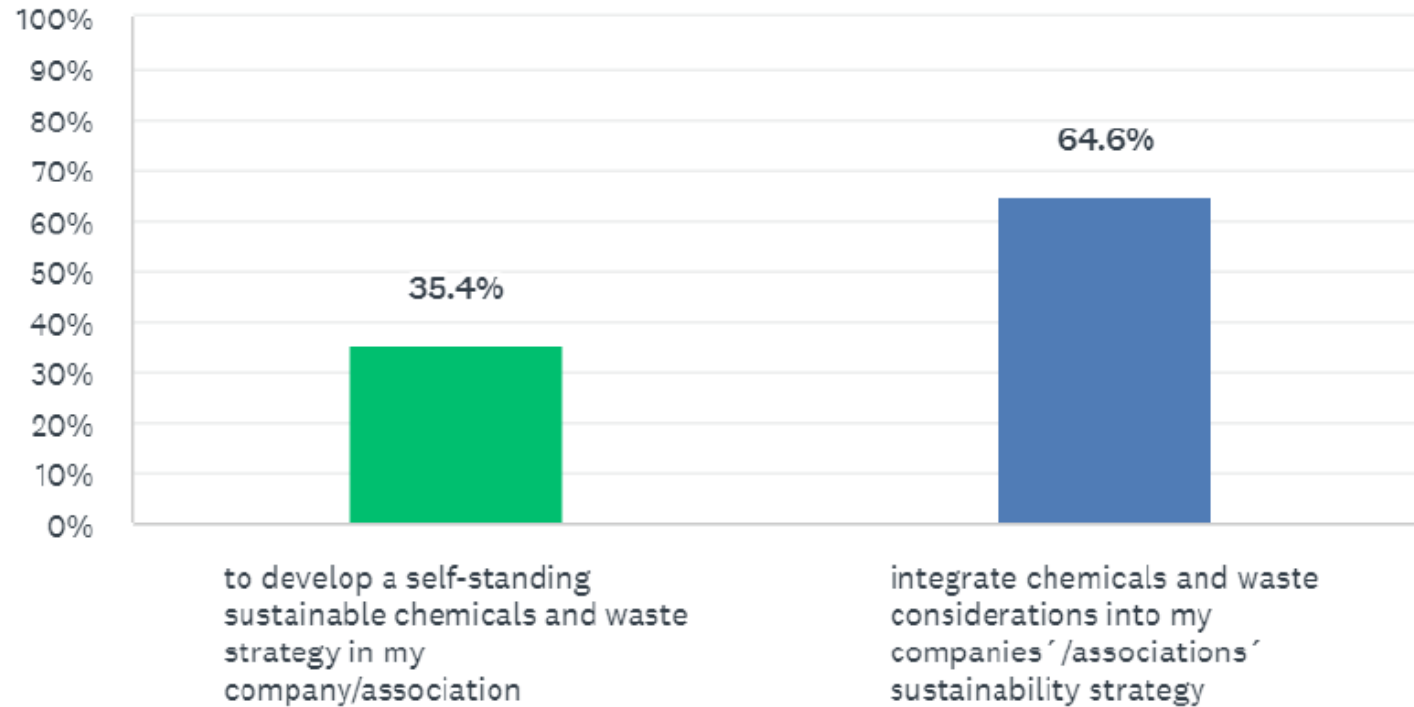

Target D 6 provides an opportunity to reflect on and strengthen chemicals and waste management in my company/association/organization - (n=152)

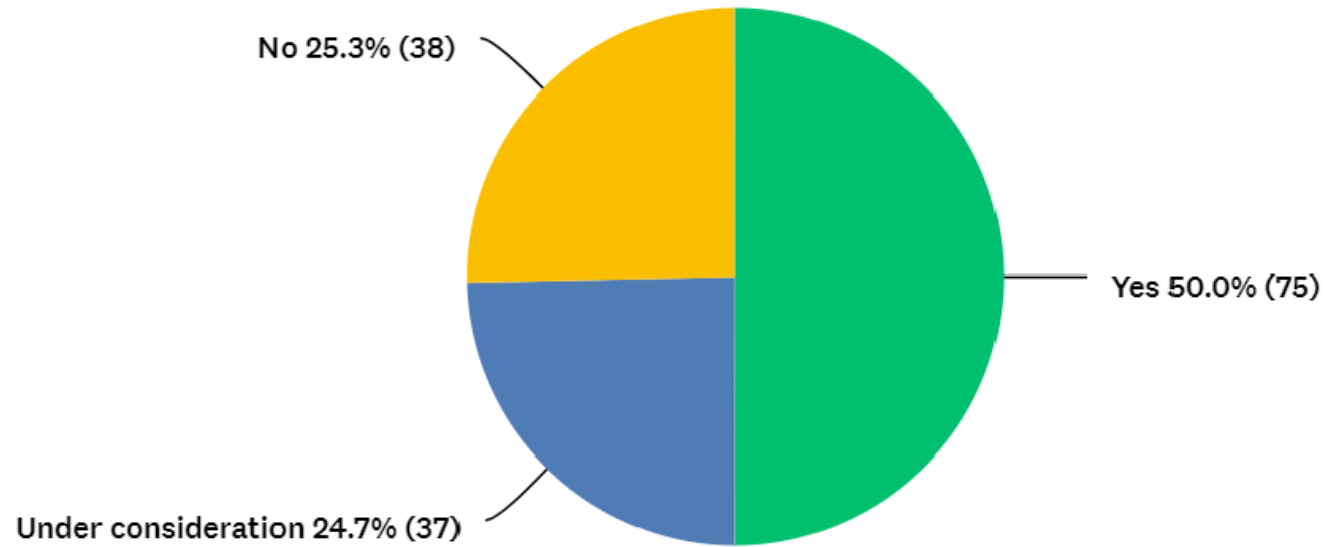

Please rate your level of agreement with the following statement:
"My company/association/organization tries to replace priority chemicals of concern in value chains."(n=151)

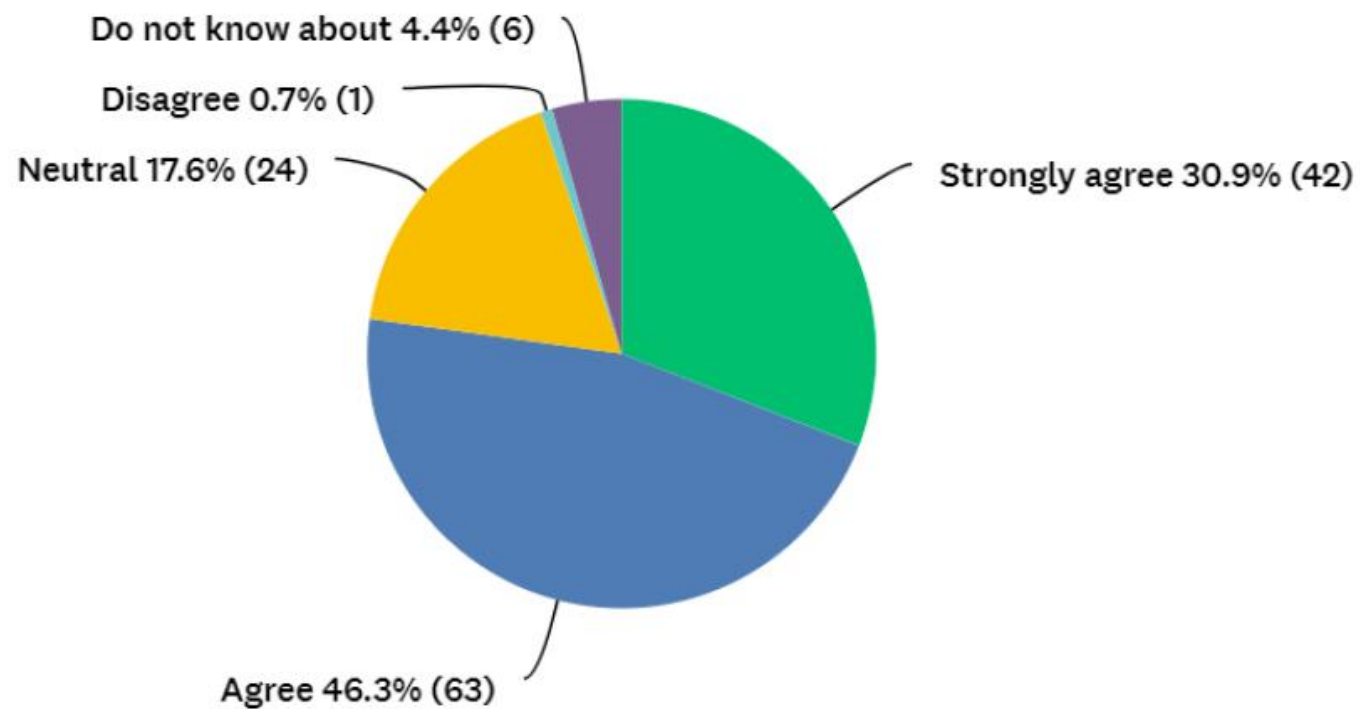

Please indicate your level of agreement with the following statements:
An effective way to implement target D 6 in my company/association/organization is (n=147)

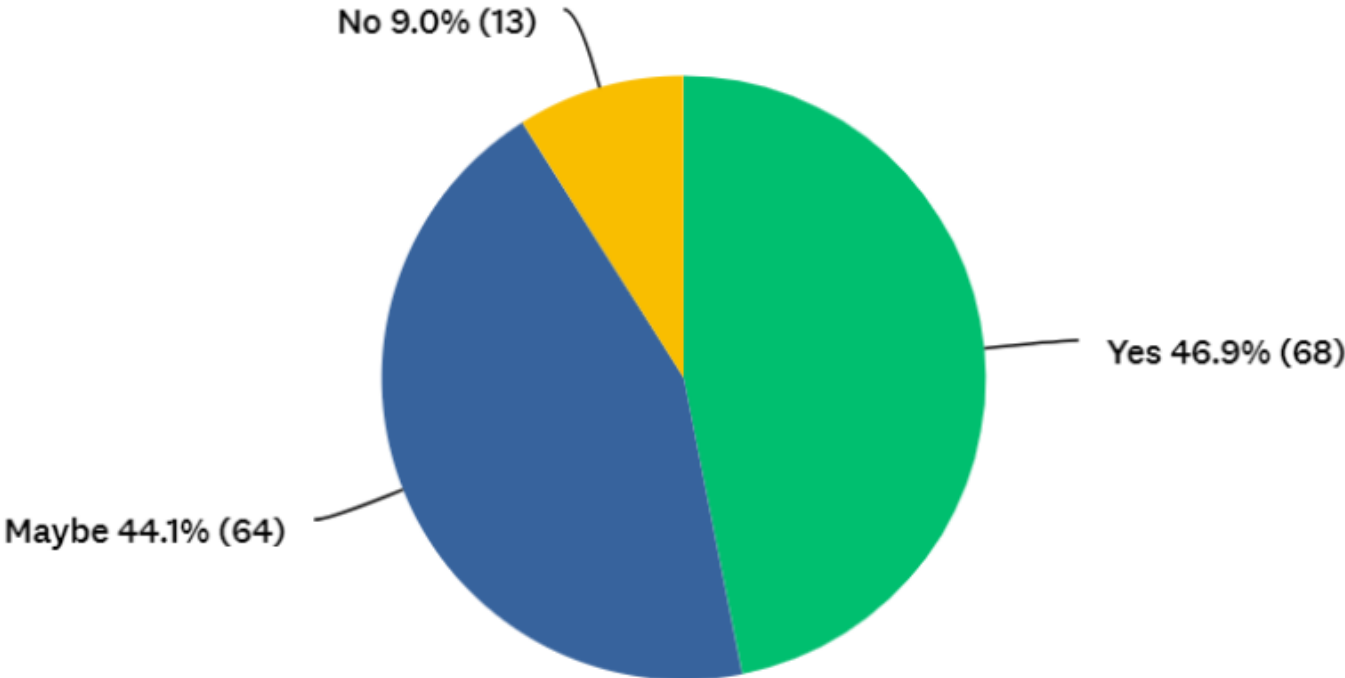

**Please indicate your level of agreement with the following statements:
My company/association/organization is already reporting on matters of chemicals and waste management using a recognized reporting standard (n=150)**

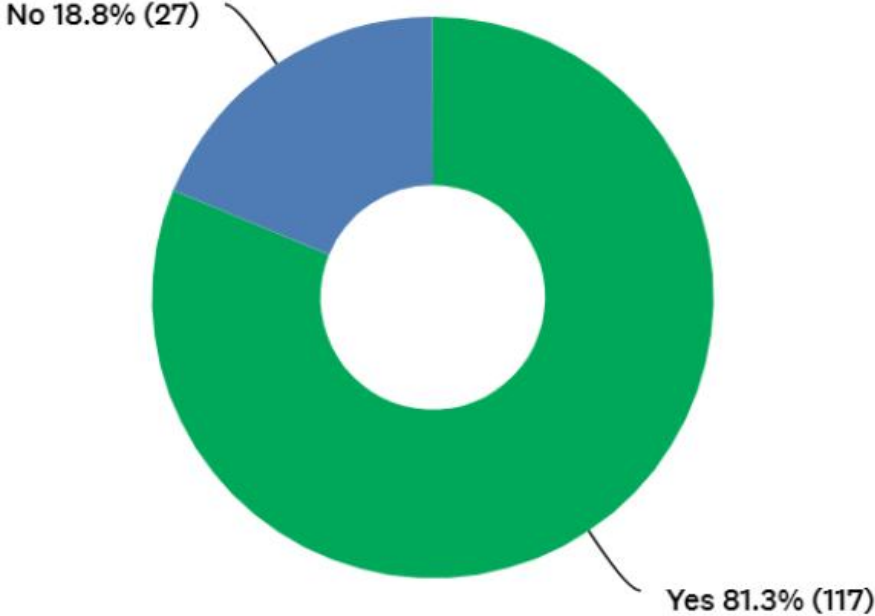

The green and sustainable chemistry objectives and guiding considerations endorsed by the UN Environment Assembly are relevant for my company/association/organization (n=136)

Availability to contribute to and review draft international guidance to support implementation of Target D 6 and D 3 (n=145)

Readiness to help raise awareness about the GFC and a possible industry Implementation Programme in my network (n=145)

THANK YOU!
